

# MANONMANIAM SUNDARANAR UNIVERSITY, TIRUNELVELI-12

# **SYLLABUS**

## **UG - COURSES – AFFILIATED COLLEGES**

Semester-V							
Part	Subject Status	Subject Title	Subject Code	Credit			
III	CORE	SOFTWARE ENGINEERING		4			
III	CORE	DATABASE MANAGEMENT SYSTEM		4			
III	CORE	IMAGE PROCESSING		4			
III	CORE	PRACTICAL: IMAGE PROCESSING LAB		4			
III	CORE	MINI PROJECT WITH VIVA VOCE- CASE STUDIES RELATED TO DBMS		4			
III	ELECTIVE	CLOUD COMPUTING / DATA ANALYTICS USING R/ NATURAL LANGUAGE PROCESSING		3			
IV	NAAN MUDHALVAN	OFFICE AUTOMATION		2			
IV		INTERNSHIP / INDUSTRIAL TRAINING / FIELD VISIT/ KNOWLEDGE UPDATION ACTIVITIES		2			

#### Total Marks: 100 Internal Exam: 25 marks + External Exam: 75 marks

#### A. Scheme for internal Assessment:

Maximum marks for written test: 20 marks

**3 internal tests**, each of **I hour** duration shall be conducted every semester.

To the average of the **best two** written examinations must be added the marks scored in. The **assignment** for 5 marks.

The break up for internal assessment shall be:

Written test- 20 marks; Assignment -5 marks Total - 25 marks

#### **B.** Scheme of External Examination

3 hrs. examination at the end of the semester

A-Part: 1 mark question two - from each unit B-Part: 5 marks question one - from each unit C-Part: 8 marks question one - from each unit

#### Conversion of Marks into Grade Points and Letter Grades

S.No	Marks	Letter Grade	Grade point (GP)	Performance
1	90-100	O	10	Outstanding
2	80-89	A+	9	Excellent
3	70-79	A	8	Very Good
4	60-69	B+	7	Good
5	50-59	В	6	Above Average
6	40-49	С	5	Pass
7	0-39	RA	-	Reappear
8	0	AA	-	Absent

# **Cumulative Grade Point Average (CGPA)**

$$CGPA = \frac{\Sigma (GP \times C)}{\Sigma C}$$

- **GP** = Grade point, **C** = Credit
- CGPA is calculated only for Part-III courses
- CGPA for a semester is awarded on cumulative basis

### > Classification

a) First Class with Distinction
 b) First Class
 c CGPA ≥ 7.5\*
 c CGPA ≥ 6.0

c) Second Class :  $CGPA \ge 5.0$  and < 6.0

d) Third Class : CGPA < 5.0

## SOFTWARE ENGINEERING

## **Learning Objectives**

- Gain basic knowledge of analysis and design of systems
- Ability to apply software engineering principles and techniques
- Model a reliable and cost-effective software system
- Ability to design an effective model of the system
- Perform Testing at various levels and produce an efficient system.

#### UNIT I

**Introduction**: The software engineering discipline, programs vs. software products, why study software engineering, emergence of software engineering, Notable changes in software development practices, computer systems engineering.

**Software Life Cycle Models:** Why use a life cycle model, Classical waterfall model, iterative waterfall model, prototyping model, evolutionary model, spiral model, comparison of different life cycle models.

#### **UNIT II**

**Requirements Analysis and Specification:** Requirements gathering and analysis, Software requirements specification (SRS)

**Software Design:** Good software design, cohesion and coupling, neat arrangement, software design approaches, object- oriented vs function-oriented design

#### UNIT III

**Function-Oriented Software Design:** Overview of SA/SD methodology, structured analysis, data flow diagrams (DFD's), structured design, detailed design.

**User-Interface design:** Characteristics of a good interface; basic concepts; types of user interfaces; component based GUI development, a user interface methodology.

## **UNIT IV**

Coding and Testing: Coding; code review; testing; testing in the large vs testing in the small; unit testing; black-box testing; white-box testing; debugging; program analysis tools; integration testing; system testing; some general issues associated with testing.

**Software Reliability and Quality Management**: Software reliability; statistical testing; software quality; software quality management system; SEI capability maturity model; personal software process.

### **UNIT V**

**Computer Aided Software Engineering:** CASE and its scope; CASE environment; CASE support in software life cycle; other characteristics of CASE tools; towards second generation CASE tool; architecture of a CASE environment.

**Software Maintenance:** Characteristic of software maintenance; software reverse engineering; software maintenance process models; estimation of maintenance cost.

#### **Text Books**

1. Rajib Mall, Fundamentals of Software Engineering, Fifth Edition, Prentice-Hall of India, 2018

#### **References Books**

- 1. Richard Fairley, Software Engineering Concepts, Tata McGraw-Hill publishing company Ltd, Edition 1997
- 2. Roger S. Pressman, Software Engineering, Seventh Edition, McGraw-Hill.
- 3. James A. Senn, Analysis & Design of Information Systems, Second Edition, McGraw-Hill International Editions.

## DATABASE MANAGEMENT SYSTEM

# **Learning Objectives**

- To enable the students to learn the designing of data base systems, foundation on the relational model of data and normal forms.
- To understood the concepts of data base management system, design simple Database models
- To learn and understand to write queries using SQL, PL/SQL.
- To enable the students to learn the designing of data base systems, foundation on the relational model of data and normal forms.
- To understood the concepts of data base management system, design simple Database models

### **UNIT I**

**Database Concepts:** Database Systems - Data vs Information - Introducing the database -File system - Problems with file system - Database systems. Data models - Importance - Basic Building Blocks - Business rules - Evolution of Data models - Degrees of Data Abstraction

#### **UNIT II**

**Design Concepts:** Relational database model - logical view of data-keys -Integrity rules - relational set operators - data dictionary and the system catalog - relationships - data redundancy revisited -indexes - codd's rules. Entity relationship model - ER diagram

#### **UNIT III**

**Normalization of Database Tables:** Database tables and Normalization – The Need for Normalization –The Normalization Process – Higher level Normal Form. **Introduction to SQL**: Data Definition Commands – Data Manipulation Commands – SELECT Queries – Additional Data Definition Commands – Additional SELECT Query Keywords – Joining Database Tables.

#### **UNIT IV**

**Advanced SQL**: Relational SET Operators: UNION – UNION ALL – INTERSECT – MINUS.SQL Join Operators: Cross Join – Natural Join – Join USING Clause – JOIN ON Clause – Outer Join.

**Sub Queries and Correlated Queries**: WHERE – IN – HAVING – ANY and ALL – FROM. SQL Functions: Date and Time Function – Numeric Function – String Function – Conversion Function

#### **UNIT V**

**PL/SQL:** A Programming Language: History – Fundamentals – Block Structure – Comments – Data Types – Other Data Types – Variable Declaration – Assignment operation – Arithmetic operators.

**Control Structures and Embedded SQL:** Control Structures – Nested Blocks – SQL in PL/SQL – Data Manipulation – Transaction Control statements.

**PL/SQL Cursors and Exceptions:** Cursors – Implicit Cursors, Explicit Cursors and Attributes – Cursor FOR loops – SELECT...FOR UPDATE – WHERE CURRENT OF clause – Cursor with Parameters – Cursor Variables – Exceptions – Types of Exceptions.

#### **Text Book**

- 1. Coronel, Morris, Rob, "Database Systems, Design, Implementation and Management", Ninth Edition
- 2. Nilesh Shah, "Database Systems Using Oracle", 2nd edition, Pearson Education India, 2016

#### **Reference Books**

- 1. Abraham Silberschatz, Henry F.Korth and S.Sudarshan,—Database System Concepts, McGraw Hill International Publication, VI Edition
- 2. Shio Kumar Singh, —Database Systems —, Pearson publications, II Edition

## **Web Resources**

1. Web resources from NDL Library, E-content from open-source libraries

# **IMAGE PROCESSING**

## **Learning Objective**

- To learn fundamentals of digital image processing.
- To learn about various 2D Image transformations
- To learn about various image enhancement processing methods and filters
- To learn about various classification of Image segmentation techniques
- To learn about various image compression techniques

#### UNIT I

Introduction & Fundamentals: Definition of image and Digital image processing - Examples of Digital image processing- Fundamental steps in Digital image processing- Components of image processing system- Image acquisition- A simple image model- Zooming and shrinking of digital image.

#### **UNIT II**

Image enhancement in spatial domain: Introduction- Mathematical analysis of enhancement in spatial domain- Basic gray level transformation- Histogram processing- Histogram equalization - Histogram matching- Image enhancement using arithmetic and logical operation- Basic transformation- Basics of spatial filtering- Image enhancement infrequency domain: One dimensional fourier transform and its inverse- Two dimensional fourier transform and its inverse- Basics of filtering in frequency domain- Homomorphic filtering.

### **UNIT III**

Color image processing: Introduction- Advantages of Color image processing-Categories of Color image processing- Color fundamentals- Primary colors - Secondary colors- Primary and secondary colors for pigments- Characteristics that are used for differentiating different colors- Color models- conversion between color models- Pseudo color image processing- Color transformation- Color image smoothing and sharpening- Color segmentation.

## **UNIT IV**

Image Compression: Introduction-Mathematical analysis- Types of data redundancies-Image compression model - Compression strategies- Morphological Image processing: Introduction- Basic concept of set theory- Logic operations involving binary images- Dilation and erosion- opening and closing.

#### **UNIT V**

Feature extraction and image segmentation: Introduction- Classification of features-Features of an image - Attributes of features- Complete process of feature extraction -

Image segmentation - Thresholding- Region based segmentation.

- 4. <a href="https://www.ijert.org/image-processing-using-web-2-0-2">https://www.ijert.org/image-processing-using-web-2-0-2</a>

## PRACTICAL - IMAGE PROCESSING

## **Learning Objective**

- To learn fundamentals of digital image processing.
- To learn about various 2D Image transformations
- To learn about various image enhancement processing methods and filters
- To learn about various classification of Image segmentation techniques
- To learn about various image compression techniques

### LIST OF EXCERCISES

- 1. Perform 2D Linear Convolution, Circular Convolution between two 2D matrices.
- 2. Perform Discrete Fourier Transform(DFT), Discrete Cosine Transform(DCT) of 4x4 gray scale image
- 3. Perform Brightness enhancement, Contrast Manipulation, Image negative of an image.
- 4. Perform threshold operation on an image.
- 5. Perform Edge detection using different edge detectors.
- 6. Perform Dilation and Erosion operation.
- 7. Perform Opening and closing operations
- 8. Read a colour image and separate the image into red, blue and green planes.

# Elective: Choose anyone - Cloud Computing/ Data Analytics using R/ Natural Language Processing

# **CLOUD COMPUTING**

## **Course Objective**

- Learning fundamental concepts and Technologies of Cloud Computing.
- Learning various cloud service types and their uses and pitfalls.
- To learn about Cloud Architecture and Application design.
- To know the various aspects of application design, benchmarking and security on the Cloud.
- To learn the various Case Studies in Cloud Computing.

#### **UNIT I**

Introduction to Cloud Computing: Definition of Cloud Computing – Characteristics of Cloud Computing – Cloud Models – Cloud Service Examples – Cloud-based Services and Applications: Cloud computing for health care, Energy systems, Government, Education. Cloud Concepts and Technologies: Virtualization – Load balancing – Scalability and Elasticity – Deployment – Replication – Monitoring – Software Defined Networking – Network Function Virtualization – Map Reduce – Identity and Access Management – Service Level Agreements – Billing.

### **UNIT II**

Cloud Services Compute Services: Amazon Elastic Computer Cloud - Google Compute Engine - Windows Azure Virtual Machines Storage Services: Amazon Simple Storage Service - Google Cloud Storage - Windows Azure Storage Database Services: Amazon Relational Data Store - Amazon Dynamo DB - Google Cloud SQL - Google Cloud Data Store - Windows Azure SQL Database - Windows Azure Table Service Application Services: Application Runtimes and Frameworks - Queuing Services - Email Services - Notifiction Services - Media Services Content Delivery Services: Amazon CloudFront - Windows Azure Content Delivery Network

#### **UNIT III**

Analytics Services: Amazon Elastic Map Reduce - Google Map Reduce Service - Google Big Query - Windows Azure HD Insight Deployment and Management Services: Amazon Elastic Bean stack - Amazon Cloud Formation Identity and Access Management Services: Amazon Identity and Access Management - Windows Azure Active Directory Open Source Private Cloud Software: Cloud Stack - Eucalyptus - Open Stack Cloud Application Design: Introduction - Design Consideration for Cloud Applications - Scalability - Reliability and Availability - Security - Maintenance and Upgradation - Performance

#### **UNIT IV**

Cloud Application Design Methodologies: Service Oriented Architecture (SOA), Cloud Component Model, IaaS, PaaS and SaaS Services for Cloud Applications, Model View Controller (MVC), REST ful Web Services – Data Storage Approaches: Relational Approach (SQL), Non-Relational Approach (NoSQL).

#### **UNIT V**

Cloud Security: Introduction – CSA Cloud Security Architecture – Authentication (SSO) – Authorization – Identity and Access Management – Data Security: Securing data at rest, securing data in motion – Key Management – Auditing. Case Studies: Cloud Computing for Healthcare – Cloud Computing for Education.

# DATA ANALYTICS USING R

## **Course Objective**

- To understand the problem solving approaches
- To learn the basic programming constructs in R Programming
- To learn the basic programming constructs in R Programming
- To use R Programming data structures lists, tuples, and dictionaries.
- To do input/output with files in R Programming.

## UNIT I

Evolution of Big data — Best Practices for Big data Analytics — Big data characteristics — Validating — The Promotion of the Value of Big Data — Big Data

Use Cases- Characteristics of Big Data Applications — Perception and Quantification of Value -Understanding Big Data Storage — A General Overview of High-Performance Architecture — HDFS — MapReduce and YARN — Map Reduce Programming Model

#### **UNIT II**

CONTROL STRUCTURES AND VECTORS -Control structures, functions, scoping rules, dates and times, Introduction to Functions, preview of Some Important R Data Structures, Vectors, Character Strings, Matrices, Lists, Data Frames, Classes Vectors: Generating sequences, Vectors and subscripts, Extracting elements of a vector using subscripts, Working with logical subscripts, Scalars, Vectors, Arrays, and Matrices, Adding and Deleting Vector Elements, Obtaining the Length of a Vector, Matrices and Arrays as Vectors Vector Arithmetic and Logical Operations, Vector Indexing, Common Vector Operations

#### **UNIT III**

LISTS- Lists: Creating Lists, General List Operations, List Indexing Adding and Deleting List Elements, Getting the Size of a List, Extended Example: Text Concordance Accessing List Components and Values Applying Functions to Lists, Data Frames, Creating Data Frames, Accessing Data Frames, Other Matrix-Like Operations

#### **UNIT IV**

FACTORS AND TABLES - Factors and Levels, Common Functions Used with Factors, Working with Tables, Matrix/Array-Like Operations on Tables, Extracting a Sub table, Finding the Largest Cells in a Table, Math Functions, Calculating a Probability, Cumulative Sums and Products, Minima and Maxima, Calculus, Functions for Statistical Distributions R PROGRAMMING.

#### **UNIT V**

OBJECT-ORIENTED PROGRAMMING S Classes, S Generic Functions, Writing S Classes, Using Inheritance, S Classes, Writing S Classes, Implementing a Generic Function on an S Class, visualization, Simulation, code profiling, Statistical Analysis with R, data manipulation

#### **Text Book**

- 1. Roger D. Peng, R Programming for Data Science —, 2012
- 2. Norman Matloff, The Art of R Programming- A Tour of Statistical Software Design, 2011

### **Reference Books**

- 1. Garrett Grolemund, Hadley Wickham, Hands-On Programming with R: Write Your Own Functions and Simulations 1, 1st Edition, 2014

# NATURAL LANGUAGE PROCESSING

## **Learning Objectives**

- To understand approaches to syntax and semantics in NLP.
- To learn natural language processing and to learn how to apply basic algorithms in this field.
- To understand approaches to discourse, generation, dialogue and summarization within NLP.
- To get acquainted with the algorithmic description of the main language levels: morphology, syntax, semantics, pragmatics etc.
- To understand current methods for statistical approaches to machine translation.

#### **UNIT I**

Introduction: Natural Language Processing tasks in syntax, semantics, and pragmatics – Issue- Applications – The role of machine learning – Probability Basics – Information theory – Collocations -N-gram Language Models – Estimating parameters and smoothing – Evaluating language models.

### **UNIT II**

Word level and Syntactic Analysis: Word Level Analysis: Regular Expressions-Finite-State Automata-Morphological Parsing-Spelling Error Detection and correction-Words and Word classes-Part-of Speech Tagging. Syntactic Analysis: Context-free Grammar-Constituency- Parsing-Probabilistic Parsing.

### **UNIT III**

Semantic analysis and Discourse Processing: Semantic Analysis: Meaning Representation-Lexical Semantics- Ambiguity-Word Sense Disambiguation. Discourse Processing: cohesion-Reference Resolution- Discourse Coherence and Structure.

### **UNIT IV**

Natural Language Generation: Architecture of NLG Systems- Generation Tasks and Representations- Application of NLG. Machine Translation: Problems in Machine

Translation. Characteristics of Indian Languages- Machine Translation Approaches-Translation involving Indian Languages.

#### **UNIT V**

Information retrieval and lexical resources: Information Retrieval: Design features of Information Retrieval Systems-Classical, Non-classical, Alternative Models of Information Retrieval – valuation Lexical Resources: WorldNet-Frame Net Stemmers-POS Tagger- Research Corpora SSAS.

#### **Textbooks**

- 1. Daniel Jurafsky, James H. Martin, —Speech & language processing, Pearson publications.
- 2. Allen, James. Natural language understanding. Pearson, 1995.

#### **Reference Books**

1. Pierre M. Nugues, —An Introduction to Language Processing with Perl and Prologl,Springer

### **Web Resources**

# **Mini Project**

Individual or group of maximum three members- Project report should be submitted for external evaluation.

**Internal** 50 marks

External 50 marks

**Mini Project** - Students will take a specific problem with a front-end and back-end (involving Database Management Systems) for the mini project and solve it and submit a report. Further each student will participate in regular project review with project guide/faculty.

#### MINI PROJECT with viva voce

Develop E-commerce platform where a customer can register and buy a product Bus/Train Reservation system Store/Insurance Management system Courier service system Library Management system etc with your own interest of database and language

### **Learning Objectives**

- To enable the students to learn the designing of data base systems, foundation on the relational model of data and normal forms.
- To understood the concepts of data base management system, design simple Database models

- To learn and understand to write queries
- To enable the students to learn the designing of data base systems, foundation on the relational model of data and normal forms.
- To understood the concepts of data base management system, design simple Database models

#### Web Resources

1. Web resources from NDL Library, E-content from open-source libraries

**Internship:** The students should submit certificate of attendance from the industry along with report for evaluation. Industrial visit/Field Visit/ Knowledge updation activity: A report should be submitted for evaluation. SEMESTER VI

# **OFFICE AUTOMATION**

**Learning Objectives:** (for teachers: what they have to do in the class/ lab/ field)

- The major objective in introducing the Computer Skills course is to impart trainingforstudentsinMicrosoftOfficewhichhasdifferentcomponentslike MS Word, MS Excel and Powerpoint.
- The course is highly practice oriented rather than regular classroom teaching.
- To acquire knowledge on editor, spreadsheet and presentation software.

#### UNIT I

Introductory concepts: Memory unit-CPU-Input Devices: Key board, Mouse and Scanner. Output devices: Monitor, Printer. Introduction to Operating systems & its features: DOS-UNIX-Windows. Introduction to Programming Languages.

#### **UNIT II**

Word Processing: Open, Save and close word document; Editing text – tools, formatting, bullets; Spell Checker - Document formatting – Paragraph alignment, indentation, headers and footers, numbering; printing–Preview, options, merge.

#### **UNIT III**

Spreadsheets: Excel— opening, entering text and data, formatting, navigating; Formulas –entering, handling and copying; Charts— creating, formatting and printing, analysis tables, preparation of financial statements, introduction to data analytics.

### **UNIT IV**

Database Concepts: The concept of database management system; Data field, records, and files, Sorting and indexing data; Searching records. Designing queries, and reports; Linking of data files; Understanding Programming environment in DBMS;

Developing menu drive applications in query language(MS–Access).

## **UNIT V**

Power point: Introduction to Power point - Features – Understanding slide typecasting & viewing slides – creating slide shows. Applying special object – including objects & pictures – Slide transition– Animation effects, audio inclusion, timers.

## **Recommended Texts**

1. PeterNorton, "IntroductiontoComputers"—TataMcGraw-Hill.

### **Reference Books**

- 1. Jennifer Ackerman Kettel, Guy Hat-
- 2. Davis, Curt Simmons, "Microsoft 2003", TataMcGraw-Hill.

## Web resources

1. Web content from NDL/ SWAYAM or open source web resource
